

**Paris September 15, 2011:** Nano-Techpower, Inc. released a photo of Nano-Techpower's President & CEO Mr. **(Fouad) Brahim Boumakh** and his son Mr. **Imad Eddine Boumakh** born on August 28, 2011. Nano-techpower is pleased to acknowledge the unexpected visit to the office of the new born son of Nano-Techpower's President & CEO while his father and the nanotechnology group were working for months now on the new nonlinear wave equations and their solutions. Such Equations were Developed for a particular class of Nano doped Lithium-ion high power density rechargeable batteries with different applications in mind and a diversified product line. Mr. **Imad Eddine** smiled for the first time when he saw the new equations, pleased his father commented it must be a good sign....**This happy occasion coincides with the corporate news that Mr. (Fouad) Brahim Boumakh President & CEO of Nano-Techpower signed today the purchase of 20 ACRES (80,000 m<sup>2</sup> Or 870, 000 SQ FT ) of land strategically located at 12 miles from an international airport, and close to the major highways; the land is for a corporate project to build a new lithium-ion battery manufacturing plant with an advanced nanotechnology Lab, integrated antennas circuitry for next generations broadband wireless devices and BTS network's backup digital Power Amplifiers (PA) modules.**
